3. Does the Company have procedures in place for sustainable sourcing (including transportation)? If yes, what percentage of your inputs was sourced sustainably?

Yes. Sustainability is deeply ingrained in ethos of our Company and it has always been the endeavour to develop and deliver quality products that are inherently safe to consume and have minimal impact on the environment. The Company has procedures in place for selecting vendors who are able to supply in a sustainable manner. The entire source of thermal energy of all breweries is from Agri-waste and the primary packaging of its products, both glass bottles and aluminium cans are recyclable. Glass bottles are collected back from the market and recycled for use in production. Cullet generated are segregated and sold back to the new glass manufacturers, thus ensuring 100% of glass is either reused or returned back to new glass manufacturers for recycling. Primary packaging constitutes almost 54% of all input cost and power and fuel constitutes about 6% of cost.

The efforts in the direction of recycling plastic wastes have taken positive steps and we have a structure in place to segregate and sell the plastic waste to a recognised body who in turn is responsible to coordinate collection and supplies to the original manufacturers to be used as an input and thus ensure full recyclability.

Initiatives undertaken at the brewery level as well as centralized procurement function in the area of transportation has consciously led to adoption of a number of dedicated vehicles fitted with GPS to track and monitor movement of vehicles in an effort to reduce the turn around time and ensure vehicle is loaded on its forward and return journey in an endeavour to reduce fuel consumption and resultant carbon emission. Supplier and transporter meets are held on a periodical basis where UBL's management engages and encourages them to undertake sustainable practices across their supply chain.

Towards its endeavour for inclusive growth, the Company procures raw and packing materials, miscellaneous items like engineering spares, lubricants, housekeeping materials and services of contract labour etc., and the like from communities located in the vicinity of the breweries of the Company. Suppliers are key partners in developing responsibly sourced supply chain for Raw Materials. Various steps have been taken for creating awareness and to ensure timely and regular supply of quality materials and services.

5. Does the Company have a mechanism to recycle products and waste? If yes, what is the percentage of recycling of products and waste (Separately as <5%, 5-10%, >10%).

Yes. Measures for Waste minimization are undertaken by UBL at all its Breweries. The Company follows 4R's principle i.e. 'Reduce', 'Recycle', 'Recover' and 'Reuse' to be environmentally sustainable. UBL is committed to adopt best-in-class practices to reduce wastages during conversion of raw materials to finished goods. Waste generated during the operations is disposed/recycled in compliance with the applicable environmental laws and as a good business practice. Trade effluent is generated in compliance with the applicable environmental laws and is recycled back into ancillary applications or discharged within the brewery for landscaping/gardening/horticulture-development purposes to reduce the fresh water consumption. The Company's breweries recycle around 19% of the treated waste water for manufacturing applications. This is a significant increase from 11% last year.

The Company reuses patented glass bottles for bottling Beer. About 65% of the bottles are reused, thereby protecting the environment. Broken glass cullet is sold to glass manufacturers. All the aluminium cans used for beer, are recycled by scrap dealers and sent back to Aluminium manufacturing companies. Paper scrap largely finds its way to the paper mills.

Spent Yeast is a process waste which is treated, dried and sold as poultry feed. Spent grain is another waste from the brewing process which is used as cattle feed. A few of our breweries sell fly ash from boilers to cement or brick manufacturers to make use of the ash generated from boilers in a constructive manner. We continue to explore opportunities for usage of fly ash in rest of the country where cement or brick manufacturers are not available. Your Company is constantly working towards adopting the best standards in environment.

The Company has been continuously improving efficiencies of usage of resources, especially that of water and energy. Resource efficiency is integrated into product and process design and is a critical component in the creation of physical infrastructure, operations, logistics and waste management.
